A fact sheet for each of the 50 states can be viewed at
<http://www.childrenspartnership.org/TPB/StateFactSheets/>

The New Workforce: Benefits of Being Prepared With Technology Skills

- At present, over half (56%) of employed Americans over age 18 use a computer at work.¹
- Between 2004 and 2014, jobs in the information technology fields are expected to increase by about 30%, for an addition of over 1 million jobs nationally.²
- 39 out of every 1,000 private sector workers in Missouri are employed by high-tech firms (33rd highest rate in the nation).³
- Missouri ranks 19th in the U.S. for overall number of high-tech workers and 24th for average high-tech wage.⁴
- In Missouri, high-tech industry workers earn an average of \$29,182 more per year than other private sector workers.⁵

How Wide is the Digital Opportunity Gap?

- 69% of households in Missouri earning less than \$15,000 per year do not own a computer compared to 39% of all Missouri's households and 38% of all households nationally.⁶
- 77% of households in Missouri earning less than \$15,000 per year do not use the Internet at home compared to 47% of all Missouri's households and 45% of all households nationally.⁷
- 15% of all Missouri's households have broadband compared to 20% of all households nationally.⁸
- Among the 50 states and the District of Columbia, Missouri ranks 30th in percentage of households with a computer, 34th in percentage of households with Internet access, and 40th in percentage of households with broadband access.⁹

Are Schools Equipping Today's Youth? Where Missouri Stands

- 18% of 4th graders and 28% of 8th graders in Missouri scored below the basic level of math that is expected in their grade (national average is 19% and 30%, respectively).¹⁰
- There are 3.5 students for every Internet-connected computer in Missouri's public schools; in high-poverty schools there are 3.6 students per connected computer (the national average is 3.7 and 3.8, respectively).¹¹
- In 14% of schools in Missouri, the majority of teachers (at least half) are "beginners" when it comes to using technology (the national average is 15%).¹²
- Missouri is not among the 34 states that has education technology standards by grade level.¹³

Missouri's Young People Most in Need

- Of the 1.4 million children in Missouri, 250,000, or 18%, are living in poverty.¹⁴ Among the 50 states and the District of Columbia, Missouri ranks 23rd in percentage of children living in poverty.¹⁵
- 33% of Missouri's children live with parents who do not have full-time, year-round employment (the national average is 34%).¹⁶
- 9% of teens in Missouri do not attend school and do not work (the national average is 8%).¹⁷
- Missouri residents aged 20-24 have an unemployment rate of 8.5% (the state unemployment rate for all ages is 4.8%).¹⁸
