

# Harnessing the Power of Partnership

We are stronger when we work together. Alongside partners and families from across the state, we drive a unified agenda for child health that prioritizes our most marginalized communities, uplifting the expertise and experiences of youth, families and community organizations to help eliminate the barriers hindering children from reaching their full potential. Together, we can achieve child health equity in California and serve as a model for the nation.

## MISSION & VISION

The Children's Partnership (TCP) is a California advocacy organization advancing child health equity through research, policy and community engagement.

We envision a California where all children – **regardless of their race, ethnicity or place of birth** – have the resources and opportunities they need to grow up healthy and thrive.

## WHAT WE DO

### POLICY

Formulate and advocate for policy recommendations rooted in racial equity that drive systemic change.

### RESEARCH

Conduct, support and disseminate research that values and incorporates community experience.

### COMMUNITY ENGAGEMENT

Support and mobilize community-centered partnerships around a shared agenda for children.

## THREE ULTIMATE OUTCOMES

For all children in California to achieve their full potential, we are working toward:

### Healthy Kids

### Strong, Economically Stable and Connected Families

### Safe and Welcoming Communities
